

SOLIS Cool Air

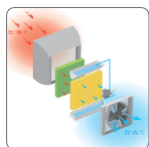

Type 7587

Cool down subtly with the innovative, eco-friendly cooling system of the fan and air cooler SOLIS Cool Air. Energy-saving and less aggressive than traditional air-conditioning solutions for a refreshing breeze in the bedroom, living room or office.

Peltier cooling system

Thermoelectric cooler converts electricity into a temperature difference and heat flow that causes a cooling effect.

Cools air with natural water

Warm air is drawn through the evaporation pad saturated with water, converting the water into vapour and blowing out cool air.

Effective cooling

Cool down the air even more and enjoy a refreshing breeze by adding ice cubes or cold packs to the water tank.

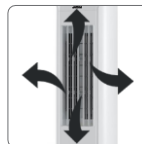

Easy to use

Optimal ease of use thanks to the control panel with temperature display, touch-sensitive buttons and a remote control.

Reduced hot exhaust air

The air cooler produces less hot exhaust air and can be positioned anywhere as it does not require installation.

Cooling at any angle

Automatic horizontal oscillation and vertically adjustable vents for comprehensive air cooling.

Features

- + 3 speed settings for a customised air flow
- + 2 modes: engage/disengage child lock, deactivate/activate display
- + Automatic switch-off timer for 1 to 8 hours of operation
- + More eco-friendly than traditional air-conditioning solutions: consumes less energy, produces less hot exhaust air and uses no harmful chemicals
- + Water tank capacity: 4 litres
- + Mesh filter catches dust and large impurities
- + 4 easy-glide castor wheels for easy transport from room to room

Technical data

Article no.:	970.04
Colour:	white
Output:	60 W
Weight:	6.2 kg
Dimensions:	26.5 x 29.5 x 82 cm (w x d x h)
EAN:	7611210970040

So Swiss, so Solis.
